L Series Linatron and E-Beam System Obsolescence Notification

Dear Varian Linatron Customer:

You are receiving this correspondence because either in the past or currently your company has been a registered user of an **L-Series Linatron** or **E-Beam System**.

This notification applies to the following products:

Linatron L100A
Linatron L200A
Linatron 400
Linatron 3000
Linatron 6000
All E-Beam Linatrons
Linatron L6-CS
Linatron L9-CS

Please use this letter as official notification that effective January 1st, 2009, Varian Medical Systems Inc., Security & Inspections Products will no longer provide service on any L-Series or E-Beam products.

Varian has been forced to discontinue the support of all L-series and E-beam systems because many of the components for these systems can no longer be purchased. For those customers who wish to maintain their equipment past January 1st, 2009, Varian service may be able to assist in a support role with any parts that remain available in Varian inventory. However, system performance and operational status cannot be assured.

Varian recommends that customers of all L-series products consider purchasing the equivalent Varian Linatron M or Linatron K system. Your Varian sales representative can explain the advantages of upgrading to this newer technology. Please contact Chuck Stirm (chuck.stirm@varian.com or +1.702.938.4859) for further information.

While Varian Medical Systems, Inc. no longer offers E-beam systems, Varian continues to invest in our Security and Inspection Products business, providing new X-ray accelerator technology, digital x-ray detectors, and other related products. As always, we would like to thank you in advance for your continued support of Varian and our products. We look forward to earning our place as your first choice for your high-energy X-radiation product needs.

Sincerely,

 22 Feb 2008

Robert Drubka, Ph.D.
General Manager
Varian Medical Systems, Security & Inspection Products
