

## Use of Varian FTP Site to Send PaxScan® Images

### To Flat Panel OEM Customers:

Please use the following FTP (File Transfer Protocol) site to send .raw images for comment or analysis by our engineers when requested: <ftp://ftp.varian.com/incoming>

### Using Internet Explorer

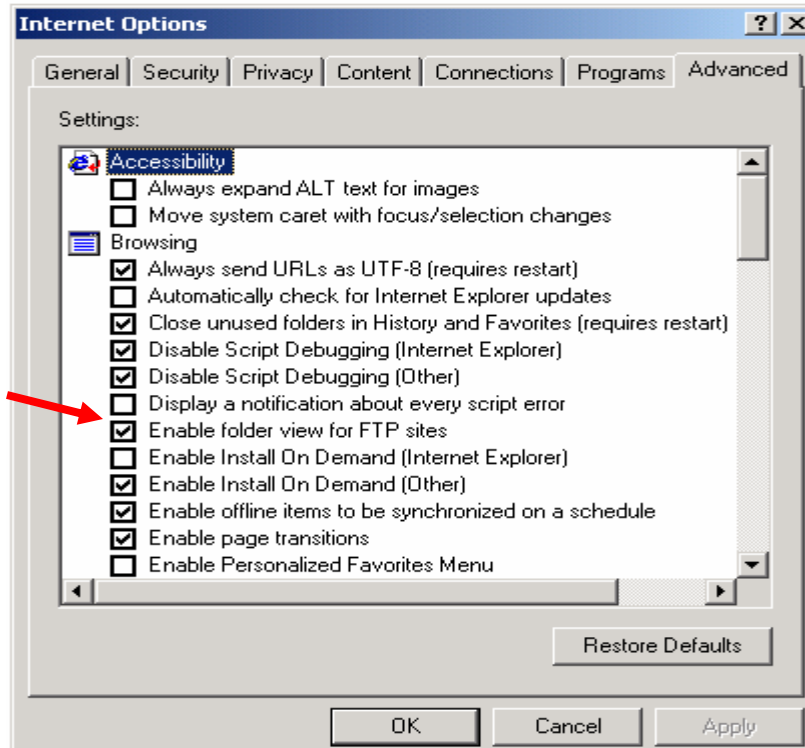

**Note:** First confirm that your FTP folder options are set correctly.

Open Internet Explorer

Select Tools>Internet Options>Advanced

Select Enable folder view for FTP sites.

Click "OK"

### Writing .raw or .zip files to the Incoming Drop Box

Note: Logon Id and password are not required.

- 1) If you want to send us more than one .raw image, please convert all of the images you want to send us into one .zip file first.
- 2) Go to <ftp://ftp.varian.com/incoming>
- 3) Locate the file in Explore. Drag the file into your open browser window. Alternatively, you can also right mouse click the file and select Copy, then go back to your browser and select Edit > Paste

### Notifying Varian of the path name and file name

Please send an e-mail to Mr. Mark Lange at [mark.lange@varian.com](mailto:mark.lange@varian.com) with cc: to Mr. Mark Batts at [mark.batts@varian.com](mailto:mark.batts@varian.com) with the path name <ftp://ftp.varian.com/incoming/XXXX> where XXXX = file name.
