Program

Introduction

Introducing a new paradigm in high quality integrated radiotherapy

Operational aspects of technology in the era of value-based therapy

Treatment planning aspects of technology in the new paradigm

Visit Varian Medical Systems, booth #4000 for more information
Velocity brings the whole picture into view for faster, more informed decisions.

Today’s cancer care teams have access to a steady stream of patient data—but limited time to synthesize and share it. Velocity™ brings all imaging scans and treatment information together into a consolidated view that transforms disconnected data into actionable clinical knowledge. Created by radiation oncology veterans, Velocity is built on insight into clinical workflows and treatment planning. It’s designed to make complex decision-making faster and collaboration easier:

Inside and outside the network. Today and tomorrow.
