

Welcome to 360 Oncology care management from Varian Medical Systems

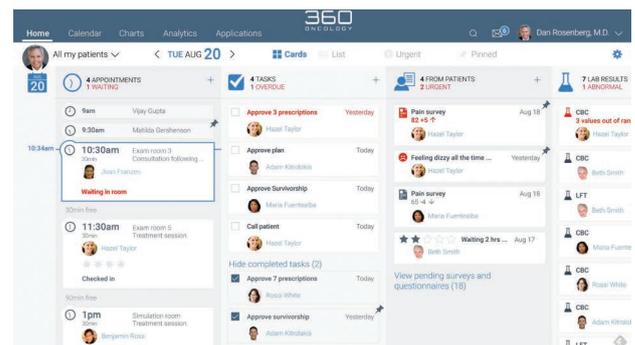

Busy cancer treatment centers and oncology departments are challenged every day by the demand to manage the entire oncology care process and interact with primary care and specialist teams. They need to provide services ranging from screening to diagnosis, and from treatment through survivorship planning. In the shift to evidence-based healthcare, providers must deliver cancer care that improves patient outcomes. To be successful, today's cancer care teams need an environment that is more integrated, patient-centered and collaborative — one that allows them to make the right decisions faster than ever before. That's not easy.

In a specialist care system as complex as oncology, new technology solutions are needed to enable care teams to go beyond the capabilities of enterprise electronic medical record (EMR) systems and ultimately achieve a new level of coordination and integration. Supporting the unique interoperability needs and workflows of cancer treatment centers and oncology departments is what 360 Oncology™ care management, from Varian Medical Systems, is designed to do.

WHAT IS 360 ONCOLOGY?

360 Oncology care management is a software solution designed to meet the full spectrum of needs in oncology care management for hospitals and cancer centers at the oncology department level. It is capable of connecting referring physicians and cancer specialists; integrating evidence, outcomes data, guidelines and care pathways; coordinating multiple treatment sites and settings; and engaging stakeholders involved in cancer care — including patients and external caregivers.

360 Oncology allows instant collaboration across your teams.

360 Oncology gives you the power to...

MAKE THE BEST DECISIONS — CONFIDENTLY

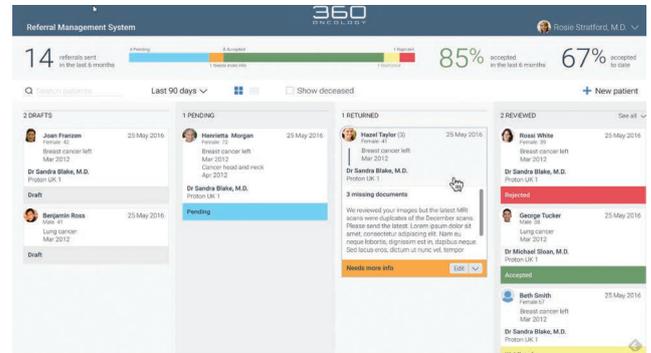

...with evidence-based support

Cancer specialists will have access to clinical evidence, outcomes data, and treatment guidelines across the spectrum of tumor types, from multiple data sources, through one integrated system.

- The ability to organize multidisciplinary tumor boards that incorporate patient records, all relevant reports, diagnostic images, team attendance tracking, and team treatment recommendation and record-keeping tools
- Clinical and operational dashboards that provide clinical evidence and outcomes data from multiple treatment centers, treatment guidelines, and proprietary data sources
- Diagnostic data aggregation tools, including auto-generation of tasks, ICD-10 code integration, and disease staging support
- Access to modules from a rapid-learning system that quickly transforms clinical evidence into clinical practice, collaboratively

Organize multidisciplinary tumor boards that incorporate patient records, all relevant reports, diagnostic images, treatment recommendations and other pertinent information.

360 Oncology's referral management system provides interfaces for hospitals, referring physicians, and patients to coordinate referrals.

ENGAGE PATIENTS — MEANINGFULLY

...with patient education, follow-up and engagement

Patient-centered care is a cornerstone of high quality cancer care. With 360 Oncology from Varian, you can integrate cancer patients into the care team with mobile-based tools and shared decision making.

- Integrate patient-reported outcomes (PROs) into treatment planning
- Allow patients to schedule appointments and issue notifications
- Provide follow-up educational materials and access to patient forums
- Engage patients in survivorship planning and ongoing communication with their care team

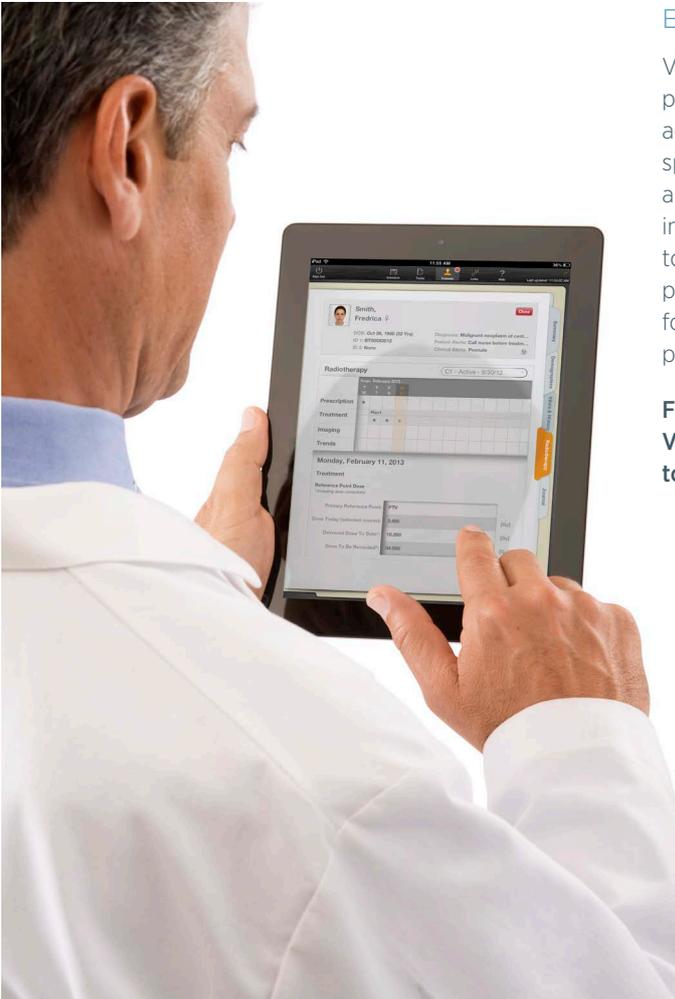

DELIVER TEAM-BASED CARE — EFFICIENTLY

...with pathways-driven care coordination and cancer treatment workflows

Cancer care providers using 360 Oncology will have a 360-degree view of the cancer patient — across care settings, multidisciplinary teams, treatment sites and departments.

- Accessible by referring physicians and specialist team members
- Capable of integration with legacy systems and enterprise EMRs
- Built-in collaboration tools
- Capable of integration into the workflows and care pathways unique to cancer treatment centers and oncology departments

360 Oncology — only available from Varian

ENABLING THE FUTURE OF CANCER CARE

Varian has been a global leader in launching software for individual points of care in oncology for years. Our many years of experience across oncology disciplines enables us to launch a dedicated solution specifically geared towards the needs of cancer treatment centers and oncology departments. Because we have a long history with interoperability between Varian and third-party systems, we are able to provide access to oncology relevant data from multiple sources, and patient engagement and care coordination tools designed specifically for cancer care. These strengths are what make 360 Oncology a powerful tool in the fight against cancer — now and in the future.
