SPECIALIZED DISCLOSURE REPORT

VARIAN MEDICAL SYSTEMS, INC.
(Exact name of the registrant as specified in its charter)

Delaware	**1-7598**	**94-2359345**
(State or other jurisdiction of incorporation or organization)	**(Commission File Number)**	**(IRS Employer Identification No.)**

3100 HANSEN WAY, PALO ALTO, CA	**94304-1030**
(Address of principal executive offices)	**(Zip code)**

John W. Kuo (650) 493-4000
(Name and telephone number, including area code, of the person to contact in connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

☒ Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2015.

Introduction:

Varian Medical Systems, Inc. is a Delaware corporation originally incorporated in 1948 as Varian Associates, Inc. Varian Medical Systems, Inc. and subsidiaries are referred to herein as the "Company."

The Company designs, manufactures, sells and services hardware and software products for treating cancer with radiotherapy, stereotactic radiosurgery, stereotactic body radiotherapy, and brachytherapy. The Company also designs, manufactures, sells and services X-ray imaging components for use in a range of applications, including radiographic or fluoroscopic imaging, mammography, special procedures, computed tomography, computer-aided diagnostics and industrial applications. In addition, the Company designs, manufactures, sells and services linear accelerators, image processing software and image detection products for security and inspection purposes. The Company also develops, designs, manufactures, sells and services proton therapy products and systems for cancer treatment.

Item 1.01. Conflict Minerals Disclosure and Report

The Company has concluded in good faith that during 2015,

a) The Company has manufactured and contracted to manufacture products as to which "conflict minerals" (as defined in Section 1, Item 1.01 (d) (3) of Form SD) are necessary to the functionality or production of such products.

b) Based on a "reasonable country of origin inquiry", the Company knows or has reason to believe that a portion of its necessary conflict minerals originated or may have originated in the Democratic Republic of the Congo or an adjoining country (collectively, sometimes referred to as the "Covered Countries"). Further the Company has determined that smelters and refiners identified as sourcing from "Covered Countries" have been audited by the Conflict-Free Sourcing Initiative (CFSI) and validated as "compliant".

The Company's reasonable country of origin inquiry employed a combination of measures to determine whether the necessary conflict minerals in any of the Company's products originated from the Covered Countries. The Company's primary means of determining country of origin of necessary conflict minerals was by conducting a supply-chain survey with direct vendors using the Electronic Industry Citizenship Coalition/Global e-Sustainability Initiative (EICC/GeSI) Conflict Minerals Reporting Template. The Company surveyed its direct vendors that were determined to have tin, tantalum, tungsten and gold in their products. Additionally, the Company used the CFSI website (http://www.conflictfreesourcing.org/), smelter company websites and other online tools to provide additional country of origin information.

Below is a summary of the information collected from all supply-chain survey respondents.

Conflict Mineral	Countries of Origin
Gold	Australia, Brazil, Chile, Kazakhstan, South Korea, Canada, Switzerland, Belgium, Bolivia, United States, France, Germany, Hong Kong, China, India, Indonesia, Papua New Guinea, Argentina, Peru, Italy, Japan, Mexico, Netherlands, Philippines, Poland, Russian Federation, Singapore, Taiwan, Thailand, Zimbabwe
Tantalum	Australia, Canada, Bolivia, Brazil, Burundi, Ethiopia, India, Mozambique, Namibia, Nigeria, Rwanda, Sierra Leone, Zimbabwe, Austria, China, Germany, Japan, Thailand, Kazakhstan, Mexico, Russian Federation, United States, Estonia, Democratic Republic of the Congo*
Tin	Australia, Belgium, Bolivia, Brazil, Canada, China, Indonesia, Malaysia, Peru, Czech Republic, France, Germany, Hong Kong, Japan, Malaysia, Philippines, Russian Federation, Singapore, South Korea, Switzerland, Taiwan, Thailand, United Kingdom, United States, Vietnam, Democratic Republic of the Congo*
Tungsten	Australia, Bolivia, Brazil, Canada, Colombia, United States, Mexico, Nigeria, Russian Federation, Rwanda, Spain, Thailand, Vietnam, Portugal, Austria, Peru, China, Germany, India, Japan, South Korea, Vietnam

* *The reported tantalum from the DRC came from 8 smelters all of which have been audited and validated as "compliant" by the* Conflict-Free Sourcing Initiative *(CFSI), which is internationally recognized for conflict free validation audits. The reported tin from the DRC came from a smelter which has been audited and validated as "compliant" by the CFSI.*

In accordance with Rule 13p-1 under the Securities Exchange Act of 1934, the Company has filed this Specialized Disclosure Form (Form SD) with the Securities and Exchange Commission and the associated Conflict Minerals Report and both documents are posted to a publicly available Internet site at https://www.varian.com/about-varian/citizenship.

Item 1.02. Exhibits

Conflict Minerals Report required by Item 1.01 is attached at Exhibit 1.01.

Item 2.01. Exhibits

1.01. Conflict Minerals Report as required by Items 1.01 and 1.02.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

VARIAN MEDICAL SYSTEMS, INC.
(Registrant)

/s/ John W. Kuo
By: John W. Kuo, Senior Vice President,
General Counsel and Corporate Secretary

May 31, 2016

Exhibit 1.01

VARIAN MEDICAL SYSTEMS, INC.
CONFLICT MINERALS REPORT
FOR THE YEAR ENDED DECEMBER 31, 2015

This report for the year ended December 31, 2015 is presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934 (the "Rule").

I. Overview

a. Company Overview

Varian Medical Systems, Inc. ("Varian") and its subsidiaries (collectively "Varian" or the "Company") design, manufacture, sell and service hardware and software products for treating cancer with radiotherapy, stereotactic radiosurgery, stereotactic body radiotherapy, and brachytherapy. The Company also designs, manufactures, sells and services X-ray imaging components for use in a range of applications, including radiographic or fluoroscopic imaging, mammography, special procedures, computed tomography, computer-aided diagnostics and industrial applications. In addition, the Company designs, manufactures, sells and services linear accelerators, image processing software and image detection products for security and inspection purposes. The Company also develops, designs, manufactures, sells and services proton therapy products and systems for cancer treatment.

b. Product Overview

The Company's operations are currently grouped into two reportable operating segments: Oncology Systems and Imaging Components. The Ginzton Technology Center ("GTC") and Varian Particle Therapy ("VPT") business are reflected in the "Other" category because those operating segments do not meet the criteria of a reportable operating segment.

Oncology Systems. The Company's largest business segment is Oncology Systems, which designs, manufactures, sells and services hardware and software products for treating cancer with conventional radiotherapy and advanced treatments such as, intensity-modulated radiation therapy, image-guided radiation therapy, volumetric modulated arc therapy, stereotactic radiosurgery, stereotactic body radiotherapy and brachytherapy, as well as informatics software for information management, clinical knowledge exchange, patient care management, practice management and decision-making support for comprehensive cancer clinics, radiotherapy centers and medical oncology practices.

Imaging Components. The Company's Imaging Components business segment designs, manufactures, sells and services X-ray imaging components for use in a range of applications, including radiographic or fluoroscopic imaging, mammography, special procedures, computed tomography, computer-aided diagnostics, and industrial applications. The Company provides a broad range of X-ray imaging components including X-ray tubes, flat panel digital image detectors, high voltage connectors, image processing software and workstations, ionization chambers and automatic exposure control systems. The Company's Imaging Components business segment also designs, manufactures, sells and services security and inspection products, which include Linatron® X-ray accelerators, imaging processing software and image detection products for security and inspection purposes, such as cargo screening at ports and borders and nondestructive examination in a variety of applications.

Other. The "Other" category is comprised of VPT and the operations of the GTC.

VPT develops, designs, manufactures, sells and services products and systems for delivering proton therapy, another form of external beam radiotherapy using proton beams, for the treatment of cancer. GTC develops technologies that enhance the Company's current businesses or may lead to new business areas, including technology to improve radiation therapy and X-ray imaging, as well as other technology for a variety of applications.

c. Supply Chain Overview

The Company's supply chain is complex, and there are multiple tiers between the Company and the mine. The Company relies on the Company's vendors to provide information on the origin of the conflict minerals contained in components that are included in the Company's products.

II. Reasonable Country of Origin Inquiry and Due Diligence Measures

For reporting year 2015, to identify and assess risk in the supply chain, the Company engaged those vendors who provide the substantial majority of the Company's components and products of which the Company believes are likely to contain conflict minerals. The Company conducted a supply chain survey of these vendors to determine whether the necessary conflict minerals in components contained in the Company's products were or were not DRC conflict free (as defined in the Rule). The survey requested vendors to identify smelters and refiners and country of origin of the conflict minerals they provide to the Company.

The Company's due diligence measures have been designed to conform, in all material respects, to the framework in the Organization for Economic Co-operation and Development ("OECD") Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (OECD 2011) and related Supplements for tantalum, tin, tungsten and gold ("3TG"). In accordance with the OECD 5 Step Framework, the Company's due diligence exercise included:

(1) Establish strong company management systems

The Company's conflict minerals team is organized by the Varian Legal Department, and includes key members of the Global Supply Chain Management team in each business unit worldwide. The Company's requirements for vendor conflict minerals management are contained in the Company's vendor training material. This team planned and executed the due diligence methods necessary to complete a reasonable country of origin inquiry, determined the risk associated with the use of conflict minerals, established steps to mitigate risks, and reported on supply chain due diligence. To assist in completing these due diligence actions, the Company became a member of the Conflict Free Sourcing Initiative (CFSI member ID VARI), which is a consortium of companies who are working together to achieve the objective of investigating and mitigating risk associated with the use of conflict minerals in their products.

(2) Identify and assess risks in the supply chain

The Company identified 345 vendors to be in-scope, based on the probability of 3TG in their products, and the Company requested a completed Conflict Minerals Reporting Template (CMRT) from all the in-scope vendors. The Company received 220 CMRTs, which represent approximately 65% of in-scope vendors, including the names and locations of smelters and refiners which process conflict minerals used in components provided by the Company's vendors. The Company evaluated the information collected, including subjecting the results to a quality review. If discrepancies, errors, or omissions were identified, the response for that vendor was deemed incomplete and was returned for correction by the vendor. The Company reviewed and compared the responses with other information in the Company's possession and, where appropriate, made further inquiries of the Company's vendors. The Company contacted vendors that did not respond by a specified date and sent reminder emails requesting their responses.

(3) Design a Strategy to Respond to Identified Risk in the Supply Chain.

After collecting the data from the in-scope vendors in the Company's supply chain, the Company assessed the risk associated with each vendor and the risk associated with each smelter or refiner (SOR) identified by the vendors. For each risk factor a course of action was determined and a plan is in place to carry them out. CFSI RCOI Data and CFSI Smelter Database data was used extensively to determine appropriate risk mitigation factors

(4) Carry out independent third-party audit of supply chain due diligence at identified points in the supply chain.

The Company cooperates with other members of the CFSI to identify SORs who require additional investigation or audit to determine whether they are a true SOR, what is the country of origin of conflict minerals processed by the SOR, and whether the SOR is conflict free. The CFSI conducts conflict free validation audits of SORs, and the Company relies on the results of those audits.

(5) Report on supply chain due diligence.

This Conflict Minerals Report constitutes the Company's annual report on the Company's 3TG due diligence, is filed with the SEC, and is available on the Company's website at https://www.varian.com/about-varian/citizenship.

III. Improvements Planned

(1) Communicate the Company's expectation on conflict minerals to vendors based on identified risks

(2) Work with vendors who distribute other companies' goods to improve the quality of RCOI data coming from those sources

(3) Work with vendors from countries outside US SEC jurisdiction to improve the quality of data

(4) Continue to improve the response rate of vendors

IV. Determination

The Company relies on its vendors to obtain complete and accurate conflict minerals information and cannot guarantee the complete accuracy of all data. However, the Company worked in good faith to achieve a reasonable level of accuracy and completeness.

The Company's due diligence identified 311 SORs which have been identified as true SORs by the CFSI (see Appendix A). The CFSI has performed conflict free validation audits on a number of these SORs and is pursuing audits for the remaining SORs. The Company is working in coordination with other members of the CFSI by providing the CFSI the SORs used in the Company's supply chain which require additional investigation or audit to confirm true SORs, country of origin, and conflict free status.

Facilities Used to Process Necessary Conflict Minerals Used in In-Scope Products: While Varian has conducted a thorough due diligence and worked closely with its vendors to survey the conflict minerals supply chain (as described above), Varian is not able to identify with reasonable certainty all facilities used to process necessary conflict minerals used in in-scope products. However, based on the information acquired through the due diligence process, Varian believes that the facilities that may have been used to process the 3TG necessary to the functionality of production of in-scope products include the smelters and refiners listed in Appendix A.

Information About Country of Origin of Necessary Conflict Minerals Used in In-Scope Products: While Varian has conducted a thorough due diligence and worked closely with its vendors to survey the

supply chain (as described above), Varian is not able to determine with reasonable certainty the countries of origin of 3TGs used in all in-scope products or whether the 3TG in all in-scope products are from recycled or scrap sources.

However, Varian has so far identified the countries of origin shown in the following table:

Conflict Mineral	Countries of Origin
Gold	Australia, Brazil, Chile, Kazakhstan, South Korea, Canada, Switzerland, Belgium, Bolivia, United States, China, France, Germany, Hong Kong, China, India, Indonesia, Papua New Guinea, Australia, Argentina, Peru, Italy, Japan, Kazakhstan, Mexico, Netherlands, Philippines, Poland, Russian Federation, Singapore, Taiwan, Thailand, Zimbabwe
Tantalum	Australia, Canada, Bolivia, Brazil, Burundi, Ethiopia, India, Mozambique, Namibia, Nigeria, Rwanda, Sierra Leone, Zimbabwe, India, Austria, China, Germany, Japan, Thailand, Kazakhstan, Mexico, Russian Federation, United States, Estonia, Democratic Republic of the Congo*
Tin	Australia, Belgium, Bolivia, Brazil, Canada, China, Indonesia, Malaysia, Peru, East Africa, Czech Republic, France, Germany, Hong Kong, Japan, Malaysia, Philippines, Russian Federation, Singapore, South Korea, Switzerland, Taiwan, Thailand, United Kingdom, United States, Vietnam, Democratic Republic of the Congo*
Tungsten	Australia, Bolivia, Brazil, Canada, Colombia, United States, Mexico, Nigeria, Russian Federation, Rwanda, Spain, Thailand, Vietnam, Portugal, Austria, Peru, China, Germany, India, Japan, South Korea, Bolivia, Vietnam

* *The reported tantalum from the DRC came from 8 smelters all of which have been audited and validated as "compliant" by the* Conflict-Free Sourcing Initiative *(CFSI), which is internationally recognized for conflict free validation audits. The reported tin from the DRC came from a smelter which has been audited and validated as "compliant" by the CFSI.*

Information about Efforts to Determine Mine or Location of Origin: The description of Varian's due diligence exercise set forth above under the heading "Reasonable Country of Origin and Due Diligence Measures" covers Varian's efforts to determine the mine or location of origin with the greatest possible specificity.
